HITEC FORTRESS

Suomenlinna Maritime Fortress is a unique attraction included in UNESCO's World Heritage List. This program is a new, fun way to get to know the fortress through team tasks delivered by famous Finnish high technology - Nokia imaging devices.

Description: Are you visiting Helsinki and interested in visiting one of the most interesting attractions in Finland? Maybe you have also heard of Finland being one of the leading countries in developing the newest technology? Why not try HiTec Fortress, an event that combines the two? Participants will be taken to Maritime Fortress of Suomenlinna, a unique historical landmark located on a group of islands right outside Helsinki.

Participants form teams and are equipped with Nokia imaging mobile phones (mobile phones with camera) which leads them through a series of tasks. The tasks are based on the history of this unique attraction. The participants will learn interesting facts about Suomenlinna's past and present in a fun way. The tasks require team skills, creativity and of course problem solving skills. Throughout the competition, the tool for receiving the tasks and delivering the answers is the imaging phone and MMS-services (multimedia services). A tasty snack is served during the event.

The teams can take the tour just for fun, or they can compete with other teams. If you are a larger party (more than 7 persons), you can form several teams and compete against each other. But if you are a small party of 4 - 7 persons, you can compete against other teams that have participated the same tour earlier!

Duration: 2 - 3 hours

Site: Suomenlinna Fortress

Operation period: Throughout the year

Service language: English

Group Size: Best suitable for groups of 4-20 persons
